No. 1. Vol. XCIII WEEK ENDED SATURDAY, 7th JANUARY, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 342—185 boys and 157 girls, while the number of births to mothers resident in the County Borough was 258.

The number of deaths registered was 124—58 males and 66 females. The number of deaths of persons resident in the County Borough was 102.

There were 2 deaths from pulmonary tuberculosis and one from tuberculous meningitis.

Eighteen deaths were due to malignant neoplasms.

There were 8 deaths from bronchitis and 5 from pneumonia.

There were 4 accidental deaths, 2 of which were due to transport accidents and one to carbon monoxide poisoning.

Among the deaths of infants under one year, 2 were due to pneumonia and one to tuberculous meningitis.

Three of the deaths recorded during the week for the County Borough were those of children under one year of age. Deaths of persons aged 65 and upwards numbered 68.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 7th January, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 278—156 boys and 122 girls, while the number of births to mothers resident in the County Borough was 204.

The number of deaths registered was 141—67 males and 74 females. The number of deaths of persons resident in the County Borough was 116.

There were 2 deaths from pulmonary tuberculosis.

Sixteen deaths were due to malignant neoplasms.

There were 5 deaths from bronchitis and 9 from pneumonia.

There were 4 accidental deaths, one of which was due to burns.

There was one suicide.

Among the deaths of infants under one year, 6 were due to pneumonia, one to whooping-cough, one to lung abscess, 6 to congenital malformation, 2 to atelectasis, 2 to prematurity, one to myocardial failure, one to birth injury and one to gastro-enteritis.

Twenty two of the deaths recorded during the week for the County Borough were those of children under one year of age, 16 of whom were under one month. Deaths of persons aged 65 and upwards numbered 53.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 14th January, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

No. 3. Vol. XCIII WEEK ENDED SATURDAY, 21st JANUARY, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 337—177 boys and 160 girls, while the number of births to mothers resident in the County Borough was 241.

The number of deaths registered was 140—79 males and 61 females. The number of deaths of persons resident in the County Borough was 119.

There were 4 deaths from tuberculosis of the respiratory system.

There was one death from diphtheria.

Eleven deaths were due to malignant neoplasms.

There were 9 deaths from bronchitis and 7 from pneumonia.

There were 8 accidental deaths, 4 of which were due to transport accidents, 2 to coal gas poisoning, one to carbon monoxide poisoning and one to drowning.

Among the deaths of infants under one year, 5 were due to congenital malformation, 3 to prematurity, one to mongolism and one to broncho-pneumonia.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 9 of whom were under one month. Deaths of persons aged 65 and upwards numbered 72.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 4. Vol. XCIII WEEK ENDED SATURDAY, 28th JANUARY, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 313—183 boys and 130 girls, while the number of births to mothers resident in the County Borough was 230.

The number of deaths registered was 118—60 males and 58 females. The number of deaths of persons resident in the County Borough was 98.

There were 2 deaths from tuberculosis of the respiratory system.

There was one death from poliomyelitis.

Eleven deaths were due to malignant neoplasms.

There were 7 deaths from bronchitis and 6 from pneumonia.

There were 10 accidental deaths, 5 of which were due to transport accidents, 2 to carbon monoxide poisoning and one to drowning.

Among the deaths of infants under one year, 2 were due to haemolytic disease of newborn, 2 to pneumonia, one to whooping cough and one to empyema.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month. Deaths of persons aged 65 and upwards numbered 56.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 28th January, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 7. Vol. XCIII WEEK ENDED SATURDAY, 18th FEBRUARY, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 310—171 boys and 139 girls, while the number of births to mothers resident in the County Borough was 231.

The number of deaths registered was 146—76 males and 70 females. The number of deaths of persons resident in the County Borough was 118.

There were 4 deaths from tuberculosis of the respiratory system.

There was one death from diphtheria.

Nineteen deaths were due to malignant neoplasms.

There was one death from influenza.

There were 12 deaths from pneumonia and 2 from bronchitis.

There were 2 accidental deaths, one of which was due to an electric shock and one to drowning.

Among the deaths of infants under one year, 5 were due to pneumonia, and 3 to congenital malformation.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month. Deaths of persons aged 65 and upwards numbered 60.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Ohlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 8. Vol. XCIII WEEK ENDED SATURDAY, 25th FEBRUARY, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 322—167 boys and 155 girls, while the number of births to mothers resident in the County Borough was 238.

The number of deaths registered was 136—71 males and 65 females. The number of deaths of persons resident in the County Borough was 118.

There was one death from tuberculosis of the respiratory system.

There was one death from diphtheria.

Eighteen deaths were due to malignant neoplasms.

There was one death from influenza.

There were 9 deaths from pneumonia and 8 from bronchitis.

There were 4 accidental deaths, all of which were due to transport accidents.

Among the deaths of infants under one year, 2 were due to pneumonia, one to whooping cough, one to bronchitis, and one to meningococcal septicaemia.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month. Deaths of persons aged 65 and upwards numbered 65.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Ohlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 9. Vol. XCIII	WEEK ENDED SATURDAY, 3rd MARCH, 1956	PRICE 2d. NET
-------------------	--------------------------------------	---------------

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 229—130 boys and 99 girls, while the number of births to mothers resident in the County Borough was 197.

The number of deaths registered was 151—79 males and 72 females. The number of deaths of persons resident in the County Borough was 141.

There were 5 deaths from tuberculosis of the respiratory system and one from tuberculous meningitis.

Twenty deaths were due to malignant neoplasms.

There were 2 deaths from influenza.

There were 9 deaths from bronchitis and 7 from pneumonia.

There were 2 accidental deaths, one of which was due to a transport accident and one to burns.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to atelectasis, 2 to congenital malformation, one to prematurity, one to haemolytic disease and one to cerebral oedema.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month. Deaths of persons aged 65 and upwards numbered 85.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Ohlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 10. Vol. XCIII WEEK ENDED SATURDAY, 10th MARCH, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 440—233 boys and 207 girls, while the number of births to mothers resident in the County Borough was 314.

The number of deaths registered was 174—85 males and 89 females. The number of deaths of persons resident in the County Borough was 148.

There were 3 deaths from tuberculosis of the respiratory system, one from miliary tuberculosis, and one from tuberculosis of the hip joint.

There was one death from diphtheria.

Fifteen deaths were due to malignant neoplasms.

There were 9 deaths from pneumonia and 6 from bronchitis.

There were 5 accidental deaths, 2 of which were due to transport accidents, 2 to carbon monoxide poisoning, and one to burns.

Among the deaths of infants under one year, 4 were due to pneumonia, 3 to prematurity, 2 to gastro-enteritis, 2 to injury at birth, one to pertussis, one to atelectasis, one to enlarged thymus, and one to adrenal insufficiency.

Fifteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 10 of whom were under one month. Deaths of persons aged 65 and upwards numbered 98.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 10th March, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 12. Vol. XCIII

WEEK ENDED SATURDAY, 24th MARCH, 1956

PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 352—182 boys and 170 girls, while the number of births to mothers resident in the County Borough was 262.

The number of deaths registered was 167—91 males and 76 females. The number of deaths of persons resident in the County Borough was 135.

There were 2 deaths from tuberculosis of the respiratory system.

Twenty-two deaths were due to malignant neoplasms.

There were 10 deaths from bronchitis and 8 from pneumonia.

There were 5 accidental deaths, 2 of which were due to burns.

Among the deaths of infants under one year, 2 were due to congenital malformation, 2 to prematurity, 2 to pneumonia, one to measles, and one to meningococcal septicaemia.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month. Deaths of persons aged 65 and upwards numbered 87.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th March, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 13. Vol. XCIII WEEK ENDED SATURDAY, 31st MARCH, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 215—100 boys and 115 girls, while the number of births to mothers resident in the County Borough was 174.

The number of deaths registered was 113—63 males and 50 females. The number of deaths of persons resident in the County Borough was 94.

There was one death from tuberculosis of the respiratory system.

Twenty-six deaths were due to malignant neoplasms.

There were 4 deaths from bronchitis and 2 from pneumonia.

There were 2 accidental deaths, both of which were due to transport accidents.

Among the deaths of infants under one year, one was due to congenital malformation, and one to prematurity.

Two of the deaths recorded during the week for the County Borough were those of children under one year of age, both of whom were under one month. Deaths of persons aged 65 and upwards numbered 62.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 31st March, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

No. 14. Vol. XCIII WEEK ENDED SATURDAY, 7th APRIL, 1956

PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 428—218 boys and 210 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 152. Of these deaths one was due to diphtheria, 7 were due to tuberculosis, and 16 to malignant neoplasms. There was one accidental death, which was due to burns.

Among the deaths of infants under one year, 5 were due to prematurity, 2 to pneumonia, 2 to congenital malformation, 2 to injury at birth, one to tuberculous meningitis, one to inflammation of the larynx and one to fibrocystic pancreatitis.

The total number of births registered during the week in the principal towns, was 649—343 boys and 306 girls, of which 182 boys and 172 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 211, of which 95 were registered in Dublin County Borough.

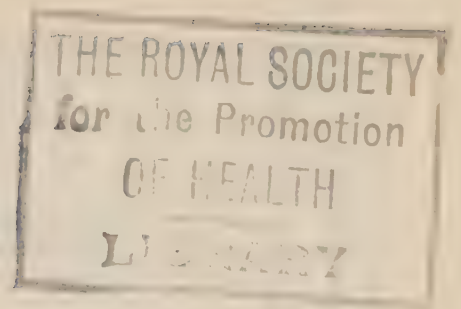

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 7th April, 1956, assigned to the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 19. Vol. XCIII WEEK ENDED SATURDAY, 12th MAY, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 440—227 boys and 213 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 185. Of these deaths 4 were due to tuberculosis, and 32 to malignant neoplasms. There were 3 accidental deaths, one of which was due to a transport accident and one to carbon monoxide poisoning.

Among the deaths of infants under one year, 4 were due to gastro-enteritis, 3 to prematurity, 3 to congenital malformation, 2 to pneumonia, one to pertussis, one to kernicterus and one to atelectasis.

The total number of births registered during the week in the principal towns, was 723—361 boys and 362 girls, of which 188 boys and 195 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 257, of which 124 were registered in Dublin County Borough.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 387—195 boys and 192 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 161. Of these deaths 4 were due to tuberculosis, and 31 to malignant neoplasms. There was one accidental death which was due to a transport accident.

Among the deaths of infants under one year, 4 were due to pneumonia, 3 to congenital malformation, 2 to prematurity, 2 to convulsions, one to stomatitis, one to pertussis and one to atelectasis.

The total number of births registered during the week in the principal towns, was 561—350 boys and 311 girls, of which 176 boys and 183 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 235, of which 116 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 9th June, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 376—195 boys and 181 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 134. Of these deaths one was due to poliomyelitis, 4 to tuberculosis, and 24 to malignant neoplasms. There were 5 accidental deaths, one of which was due to a transport accident and one to drowning.

Among the deaths of infants under one year, 4 were due to gastro-enteritis, 3 to prematurity, one to pneumonia, one to atelectasis, one to Pink's disease and one to hydrops foetalis.

The total number of births registered during the week in the principal towns, was 588—292 boys and 296 girls, of which 154 boys and 169 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 212, of which 169 were registered in Dublin County Borough.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 35. Vol. XCIII WEEK ENDED SATURDAY, 1st SEPTEMBER, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 360—168 boys and 192 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 152. Of these deaths 2 were due to tuberculosis and 29 to malignant neoplasms. There were 5 accidental deaths, one of which was due to a transport accident and one to drowning.

Among the deaths of infants under one year, 2 were due to prematurity, 2 to atelectasis and one to asphyxia

The total number of births registered during the week in the principal towns, was 573—291 boys and 282 girls, of which 180 boys and 156 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 215, of which 130 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 1st September, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 40. Vol. XCIII WEEK ENDED SATURDAY, 6th OCTOBER, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 377—183 boys and 194 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 132. Of these 4 deaths were due to tuberculosis and 22 to malignant neoplasms. There was one accidental death.

Among the deaths of infants under one year, 5 were due to gastro-enteritis, 3 to congenital malformation, 2 to atelectasis, 2 to prematurity, one to injury at birth, one to marasmus, one to convulsions, one to anoxia, one to pyelitis, and one to bronchopneumonia.

The total number of births registered during the week in the principal towns, was 612—303 boys and 309 girls, of which 165 boys and 151 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 190, of which 104 were registered in Dublin County Borough.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 45. Vol. XCIII WEEK ENDED SATURDAY, 10th NOVEMBER, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 337—140 boys and 197 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 153. Of these 3 deaths were due to tuberculosis and 26 to malignant neoplasms. There were 3 accidental deaths, one of which was due to a transport accident. There was one suicide.

Among the deaths of infants under one year, 7 were due to pneumonia, 4 to congenital malformation, one to atelectasis, and one to bronchitis.

The total number of births registered during the week in the principal towns, was 500—230 boys and 270 girls, of which 139 boys and 168 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 241, of which 130 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday 10th November, 1956, for the Principal Towns with similar particulars for BELFAST and DERRY.

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 50. Vol. XCIII WEEK ENDED SATURDAY, 15th DECEMBER, 1956 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 355—184 boys and 171 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 150. Of these, 5 deaths were due to tuberculosis and 19 to malignant neoplasms. There were 3 accidental deaths, one of which was due to a transport accident.

Among the deaths of infants under one year, 3 were due to congenital malformation, 3 to pneumonia, 2 to prematurity, 2 to gastro-enteritis, one to dermatitis exfoliativa and one to neo-natal infection.

The total number of births registered during the week in the principal towns, was 613—314 boys and 299 girls, of which 161 boys and 147 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 219, of which 96 were registered in Dublin County Borough.
